My Thoughts:

First race on the R6! This was basically a test weekend, getting the bike settings right and troubleshooting etc. The R6 has a stock motor and we purposely used worn out tires from Dunlop so taking all of these things into consideration, this was a VERY encouraging weekend! Found out the tire warmers we were using were not getting up to temp. as they should which wasn't helping and explained a few other past grimlins. Also, we are working closely with Miles Thorton's dad Richard to get us and the bike ready for AMA SuperSport next year. The technical director for AMA Pro Racing invited us to hangout in the pits of the last SuperBike race to help us get ready for AMA Racing. All in all, this weekend brought valuable information.

A big Thank You to MARRS Performance Cycles for all the help putting the new motor in the bike.

MotoSkinz is working on the new graphics which I'm sure will be really cool, it will be based on the SuperBee theme. We are doing a 4-hour Ninja 250 Endurance race, then our next 600 race is at Barber Sept. 10.

Will keep you posted on future events. God bless !

Thank you very much for your support
